

Social Emotional Learning Implementation Audit

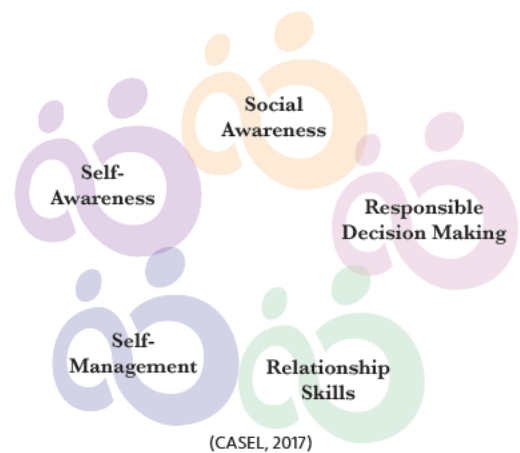

Assessing SEL implementation in schools and districts

Aligned with research on Social Emotional Learning

The SEL Audit determines the extent school and district SEL initiatives are comprehensive and focused on the five intrapersonal, interpersonal, and cognitive competencies from the Collaborative for Academic, Social, and Emotional Learning's framework.

Gathers credible evidence from a variety of sources

To ensure trustworthiness, we rely on multiple forms of data. Trained specialists visit your site to systematically collect information from stakeholders at multiple levels using our proprietary assessment tools.

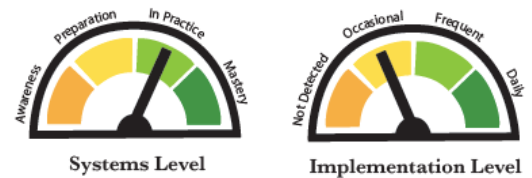

Provides meaningful and actionable information

The audit report identifies gaps and overlaps by clearly indicating:

- developmental levels of initiatives within each SEL competency
- levels of implementation for each SEL competency
- teacher needs for support and development
- detailed information about each SEL initiative

Depending on the number of participating schools, we aggregate data at the district level and disaggregate it at the building level.

Our reports are designed to help you identify where to devote attention and resources for taking your SEL implementation to the next level. We will also work with you to create a data collection and reporting package that meets your specific needs.

Needs Assessment
